

MORPHEUS8

Stimulate the production of collagen and resurface your skin to discover a younger looking you.

WHAT IS MORPHEUS8?

Morpheus8 is a fractional skin treatment that stimulates collagen production of the underlying layers of the dermis. By targeting the deeper layers of the skin, tissues of the face and body can be remodeled to reveal a more radiant youthful appearance.

WHAT AREAS CAN BE TREATED?

Morpheus8 can be used on any areas that can benefit from resurfacing and subdermal renewal. The most commonly treated areas include the face, periorbital area, abdomen, thighs, legs, and buttocks.

ENHANCE YOUR SKIN & BUILD COLLAGEN

"I was concerned about my deep lines and drooping jowls and wanted a more defined look. I couldn't be happier with my results and am told I look much younger. I highly recommend Morpheus8."

- LENA | PATIENT

HOW MANY SESSIONS ARE RECOMMENDED?

Your practitioner will recommend the optimal number of sessions to be performed based on your personal objectives. Treatment times and frequency will be specifically tailored to obtain the optimal results.

HOW QUICKLY WILL I SEE RESULTS?

Visible results can be seen within a few days, but typically after three weeks the most noticeable results appear. Improvements continue up to three months after treatment.

WHAT IS THE BENEFIT OF FRACTIONATED ENERGY?

Radiofrequency (RF) energy is a scientifically proven method to remodel and rebuild collagen. It is minimally invasive, using a matrix of micro pins to renew the deeper layers of the skin with almost no patient downtime.

CAN ANYONE USE MORPHEUS8?

The benefit of Morpheus8's color blind technology is that it can be used on all skin types. The unique properties allow even darker tones to be treated.

CAN THIS BE USED IN COMBINATION WITH OTHER TREATMENTS?

Yes, Morpheus8 can be used in the same treatment session, or a few days after other treatments. Morpheus8 can also be combined with other InMode energy treatments or injectables to achieve more extensive results.

WHEN CAN I PUT MAKE-UP ON AFTER TREATMENT?

Since patient downtime is minimal, makeup can be applied 1 to 2 days after the treatment. Patients should expect to see micro lesions a few days after treatment and slight redness depending on treatment parameters.

WHAT KIND OF POST PROCEDURE CARE IS REQUIRED?

Patients should moisturize the treatment area and avoid direct sun exposure. It is also recommended that patients use a broad spectrum sunscreen every day. In addition to reducing the risk of skin cancer, sunscreens also slow the aging process.
